

DOIST CONNECT • DENMARK 2026

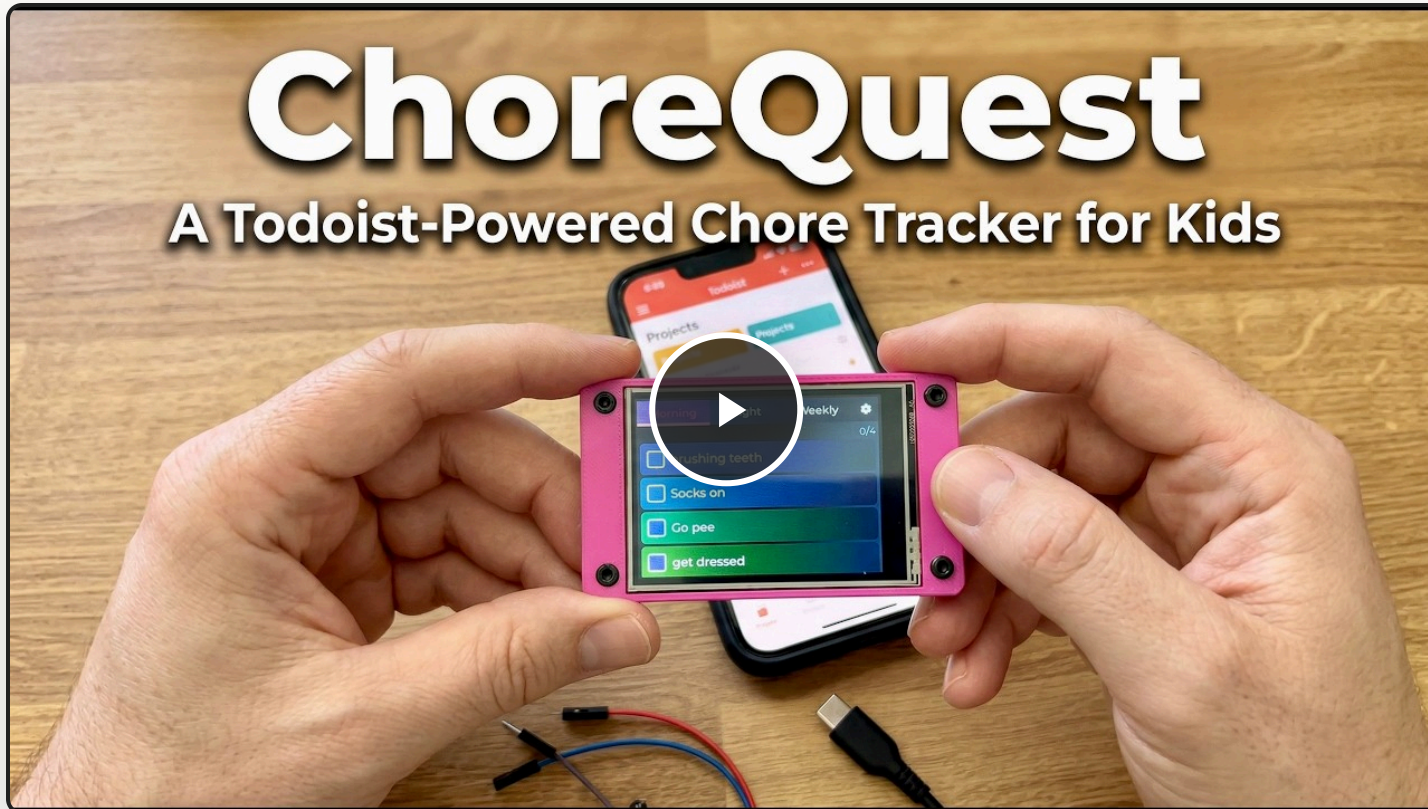

Fun with Hardware

From idea to working device.

ChoreQuest

A Todoist-Powered Chore Tracker for Kids

- Recurring chores come from Todoist.
- Kids tap tasks complete on the CYD.
- Finishing the list reveals a daily reward.

TINY BUT CAPABLE

What is CYD good at?

- **Focused touch interfaces**

- **Games, timers, and dashboards**

- **WiFi and Bluetooth projects**

- **LEDs, sensors, and sound**

- **Remember settings and high scores**

KNOW THE EDGES

What is CYD bad at?

- **Small screen: 320 × 240 pixels**
- **Limited memory: about 320 KB RAM**
- **No GPU**
- **Resistive touchscreen**
- **Single touch only**

YOUR WORKSHOP TOOLKIT

What's in the repo

01 /cyd-init **setup skill**

02 cyd-development **skill**

03 **Tap Quest starter**

04 **Open APIs**

05 **Inspiration projects**

/cyd-init

Installs if missing

- + **Git**
- + **Python 3**
- + **PlatformIO**
- + **ESP32 tools + libraries**

Looks for

- ✓ **Connected CYD**
- ✓ **ESP32 with 4 MB flash**
- ✓ **Working screen**
- ✓ **Working touch**

Fun with Hardware

 github.com/JefCurtis/cyd

Bring these three things

Laptop

USB data cable

CYD device

1 • Clone in Terminal

```
git clone https://github.com/JefCurtis/cyd.git
```

2 • Enter the project folder

```
cd cyd
```

3 • Open the folder in your AI agent, then run

```
/cyd-init
```
